FEEL THE POWER OF NATURE

Cow Farming

**GROWTH
MASTER**

The profit from cattle farming varies depending on the type of farming, the breed of cattle, and other factors.

Dairy farming in India, the approximate profit per cow per day is Rs. 1000.

The income from dairy farming ranges between ₹15,000 to ₹18,000 monthly.

Milk is typically sold at the dairy for ₹45 - ₹50 per liter.

The Sahiwal breed of dairy cattle is known for their high milk production. Organic farming of grass-fed can be profitable due to lower input costs and premium selling prices.

Goat Farming

**GROWTH
MASTER**

The net income for most goat farmers in India is between ₹2,000 and ₹3,000 per adult female goat per month. With improved management, productivity can increase by 90–180%.

This can increase the gross and net income to ₹7,500–10,000 and ₹5,000–7,500 per goat per year, respectively.

Factors affecting profitability

Goat breed : The best breeds for farming in India include Jamunapari, Barbari, Sirohi, and Beetal.

Management : Effective management and marketing are crucial for maximizing profits.

Market access : Access to markets for goat meat, milk, and other by-products is important.

Vermicompost

**GROWTH
MASTER**

Vermicompost farming can be profitable, with farmers earning hundreds of thousands of rupees per year. The profit margin for a home-based vermiculture business can be around 40%.

Factors that affect profitability

Production scale

Vermicompost production can be started on any scale, but it's recommended to start small and expand later.

Market demand

The demand for vermicompost can affect the profitability of a vermicompost farm.

Production costs

The cost of production for vermicompost can include the cost of agro waste, cow dung, and mother earthworms
